IN THE CLAIMS:

1.   (Currently Amended) A method for providing alternate images in an electronic document, comprising:

        identifying an initial image to be displayed in an electronic document;

        explicitly providing references to alternate images of the initial image within the same electronic document, wherein the alternate images differ from the initial image in size and resolution, and wherein the alternate images are different-sized versions of the initial image;

        displaying the initial image;

        providing a selector for accessing the alternate images; and

        responsive to receiving user selection input, replacing the initial image with an alternate image and reformatting the electronic document, wherein reformatting the electronic document comprises reflowing text around the alternate image in the electronic document to accommodate changes in image size.

2.   (Original) The method according to claim 1, wherein the alternate images are cached in memory.

3.   (Previously Presented) The method according to claim 1, wherein the alternate images are stored on a server and at least one of the alternate images is automatically downloaded from the server concurrent with the displaying step.

4 - 5.   (Cancelled)

6.   (Original) The method according to claim 1, wherein the size of the initial image is preset by the user.

7.   (Original) The method according to claim 1, wherein image resolution adjusts automatically with changes in image size.

8.   (Original) The method according to claim 1, wherein the selector comprises indicators displayed on the image.

9.   (Original) The method according to claim 1, wherein clicking on the image itself provides access to alternate images.

10.   (Original) The method according to claim 1, wherein the electronic document may be used within browser, word processing, and desktop publishing applications.

11 - 18. (Cancelled)
